JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

Volume 31, Numbers 1-6, 1990

(A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*)

Engl./Russ.

Volume 31, Number 1, January-February, 1990

New Microscopic Models of Clustering Kinetics - V. G. Dubrovskii	1	3
Computational Modeling of a Subsonic Nonisentropic Flow of a Compressible Gas in the Discharge Gap of a Transverse-Flow Continuous Wave Laser - G. V. Gadiyak, A. L. Dobrivskii, and K. A. Nasyrov	9	10
Beaded Structure of Discharge Breakdown in a Nonuniform Field - E. A. Zobov and A. N. Sidorov	16	16
An Accurately Solvable Problem of the Mutual Effect of Inclusions in the Theory of Heterogeneous Media - Yu. P. Emets and Yu. V. Obnosov	21	21
Cooling of a Magnetized Plasma at a Boundary with an Exploding Metal Wall - S. F. Garanin and V. I. Mamyshev	28	30
Mathematical Model for Resonance in an Ion Convection Pump - N. P. Avdeev, G. I. Bumagin, A. F. Dudov, and R. K. Romanovskii	35	37
Approximate Formulas for the Viscosity and Heat Conduction Coefficients of Partially Dissociated and Ionized Air - S. V. Zhluktov, I. A. Sokolova, and G. A. Tirskii	39	41
Resistance of a Body with an Intrinsic Magnetic Field in a Superonic Flow of a Partially Ionized Gas - V. V. Gubin and V. A. Shuvalov	47	50
Rheological Behavior of a Dilute Suspension of Relatively Coarse Deformable Particles in a Simple Shear Flow - M. M. Esmukhanov	51	55
Convective Instability in a Medium with Spiral Turbulence - Yu. A. Berezin and V. P. Zhukov	57	61
Effect of Interphase Mass Transfer on the Turbulence Energy of a Flow of a Gas Suspension - V. A. Naumov	61	66
Onset of Thermocapillary Convection in a Two-Layer System with the Release of Heat at the Interface - A. A. Nepomnyashchii and I. B. Simanovskii	64	69
High-Vacuum Low-Temperature Adsorption in Long Layers of Adsorbent - V. I. Kupriyanov, K. B. Pavlov, A. Yu. Poluéktova, and A. S. Romanov	68	73
Critical Conditions for Melt Retention during Induction Melting in a Cold Crucible - A. G. Merzhanov, V. A. Raduchev, É. N. Rumanov, and A. S. Shteinberg	73	78
Mechanism of Lamination of Particulate Composities in Shock Loading - N. A. Kostyukov	79	84
Effective Elastic Moduli of Granular Media - A. D. Zaikin	85	91
Generalized Self-Consistent-Field Method for Determining the Elastic Properties of Heterogeneous Materials - P. V. Gel'd and E. A. Mityushov	90	96
Numerical Investigation of Recirculation Flows in a Three-Dimensional Cavern - V. M. Belolipetskii and V. Yu. Kostyuk	93	100
Application of the Regularization Method to Determination of Multilayer Strata Parameters - M. Kh. Khairullin	97	104
Possibilities for Constructing a Unified Failure Theory - A. G. Ivanov	101	109
Pressing of a Compact Plastic Material - S. E. Aleksandrov and B. A. Druyanov	108	117
Analytical Description of the Irreversible Deformation of Metals during Thermocycling - É. I. Blinov	114	123
Behavior of Rubber in Shock Waves and Rarefaction Waves - Yu. B. Kalmykov, G. I. Kanel', I. P. Parkhomenko, A. V. Utkin, and V. E. Fortov	116	126
Movement of the Free Boundary of a Half-Space during the Propagation of an Oblique Straight Crack - V. A. Saraikin	120	130

	Engl./Russ.	
Branching Methods of Analyzing a Disturbance of the Critical-Pressure Spectrum of Shells of Revolution and Some Applications of These Methods - V. V. Larchenko	125	136
Stresses in a Plate Kept in Equilibrium by a Pin - V. N. Solodovnikov	132	144
Technical Stability in a Straight Pipeline Containing a Flowing Liquid - K. S. Matviichuk	136	148
Application of the Holographic Interferometry Method to Determine with Stress Intensity - V. P. Tyrin	142	155
Ion Current Saturation on Electric Probes in Plasma Flows at Low Reynolds Numbers - Z. M. Egorova, A. V. Kashevarov, and N. S. Tskhai	146	159
The Light "Knife" Method for Studying Aerodynamic Processes in the Combustion Chambers of Diesel Engines - V. M. Boiko, O. G. Kudelin, O. N. Lebedev, G. E. Lushchaev, and A. A. Plesovskikh	152	164
Discussion of the Choice of Control Points in the Method of Discrete Vortices - D. N. Gorelov	156	167
Vortex-Free Popuision in an Ideal Fluid - R. M. Garipov	160	171

Volume 31, Number 2, March-April, 1990

Electrohydrodynamic Ion Emitters - V. G. Dudnikov and A. L. Shabalin	163	3
Instability of an Electron Beam in a Magnetic Field - V. A. Malafaev, A. A. Nikul'shina, and D. N. Novichkov	170	10
Structure of a Strong Shock Wave in a Plasma - V. G. Ledenëv	176	17
Waves in a Chemically Active Bubbled Medium - F. N. Zamaraev, V. K. Kedrinskii, and C. Mader	179	20
Problems with One-Sided Constraints for Navier–Stokes Equations and the Dynamic Contact Angle - C. Baiocci and V. V. Pukhnachev	185	27
Fundamental Solution of a Cauchy–Poisson Problem for a Basin with an Uneven Bottom - A. A. Korobkin	198	40
Equilibrium Stability of a Fluid Layer under the Action of Thermocapillary Forces in the Quasistationary Approximation - L. K. Antanovskii	205	47
Theroretical and Experimental Study of Convection in a Liquid Layer with Local Heating - V. A. Al'vares-Suares, Yu. S. Ryazantsev, and V. M. Shevtsova	210	53
Evolutionary Equation for Perturbations in a Two-Layer Film Flow - O. Yu. Tsvelodub	214	57
Stability of a Boundary Layer with Transonic External-Flow Velocities - O. S. Ryzhov and I. V. Savenkov	222	65
A Self-Similar Solution of the Boundary Layer Equations - G. I. Burda	228	71
Disturbances of High Modes in a Supersonic Jet - N. A. Zheltukhin and N. M. Terekhova	232	75
Resonance Flow Randomization in the K-Regime of Boundary-Layer Transition - S. V. Dryganets, Yu. S. Kachanov, V. Ya. Levchenko, and M. P. Ramazanov	239	83
Wave Structure of Artifical Perturbations in a Supersonic Boundary Layer on a Plate - A. D. Kosinov, A. A. Maslov, N. V. Semenov, and S. G. Shevel'kov	250	95
Hydrodynamics of a Quasi-One-Dimensional Packet - G. A. Kuz'min and A. Z. Patashinskii	253	98
Perturbations Ahead of a Wing Moving in a Stratified Fluid - V. I. Bukreev and N. V. Gavrilov	257	102
Problem of the Supersonic Flow Around a Thin Finite Span Wing with Completely Subsonic Leading Edges - N. F. Vorob'ev	260	105
Self Motion of a Body in a Fluid - V. L. Sennitskii	266	111
Principal Energy Characteristics of a Linear Jet Engine - A. E. Voitenko	273	118
Fundamental Equations in Creep Theory - V. S. Namestnikov	276	121
Analytical Method for Solving Nonlinear Multilayer Anisotropic Plate Theory Problems - É. I. Grigolyuk and G. M. Kulikov	281	126
Double Waves in an Ideal Rigidly Plastic Body under Plane Deformation - S. V. Meleshko	286	131

	Engl.	Russ.
Design of Laminar and Fibrous Composites with Given Characteristics - B. D. Annin and A. G. Kolpakov	292	136
Rational Bounding in the Problem of the Plane Stress State of an Ideal Fiber Composite - V. I. German and V. V. Kobelev	306	150
Finite Plane Strains of an Incompressible Elastic Material - V. D. Bondar'	311	155
Analysis of Fringe Patterns by the Method of Integral Boundary Equations in the Solution of Plane Elastoplastic Problems - S. L. Zolotukhin and V. K. Kosenyuk	320	164
Determination of Stress Intensity Factors at the Tips of Cracks Growing from Loaded Holes in Finite Anisotropic Plates - V. N. Maksimenko	326	171
Investigation of the Structure of Stratified Flows by the Method of Laser Scanning - E. V. Gumennik and Yu. D. Chashechkin	333	177
Current Control with a Variable Inductance - P. I. Zubkov, L. A. Luk'uanchikov, and K. A. Ten	338	182

Volume 31, Number 3, May-June, 1990

	Engl.	Russ.
Scattering of a Beam of Fast Hydrogen Atoms on Gas Targets - V. I. Batkin, V. N. Getmanov, and O. Ya. Savchenko	343	3
Gasdynamic Self-Structure under Unstable Evaporation of Cathodes in a Pulsed Unipolar Discharge - V. G. Zhogol', V. F. Reznichenko, S. V. Selishchev, and A. A. Uglov	347	8
Electrical Breakdown in Ammonium Perchlorate - Yu. N. Sukhushin and I. G. Khaneft	351	12
Flow of a Planar Shock Wave around a Thermal Layer at a Rigid Wall - B. I. Zaslavskii, S. Yu. Morozkin, A. A. Prokof'ev, and V. R. Shlegel'	354	15
Hydrodynamic Analysis of the Process of Making Three-Layer Optical Fibers and Calculation of the Field of Elastic Stresses and Birefringence - A. L. Yarin	361	23
Structure of Chemically Nonequilibrium Flows with a Sudden Change in the Temperature and the Catalytic Properties of the Surface - V. V. Bogolepov, I. I. Lipatov, and L. A. Sokolov	367	30
Thermodynamic Properties of Ice, Water, and a Mixture of the Two at High Pressures - O. V. Nagornov and V. E. Chizhov	378	41
Spectral Models for Cascade Processes in Homogeneous Turbulence - A. G. Bershadskii	385	49
Plane Cauchy-Poisson Problem for a Pond with a Smoothly Changing Bottom. Examples of Numerical Computations - A. A. Korobkin and I. V. Sturova	390	54
Solution of the Problem of Ideal Fluid Flow in the Neighborhood of Body and Wing Apices - A. V. Voevodin and G. G. Sudakov	395	60
Interaction of Plane Non-Parallel Jets - Yu. G. Gurevich	400	65
Irrotational Flow of the Ideal Fluid Stream around a Rotating Plate - V. S. Sadovskii	406	71
A Theory of Deep Dynamic Wing Stall - G. I. Taganov	408	72
Field of Horizontal Velocities Created by a Moving Source of Perturbations in a Stratified Fluid - V. F. Sannikov	413	78
Certain Nonisothermal Flows of Fluid - V. I. Naidenov and A. D. Polyanin	419	83
Effect of a Gas Cavity on a Pressure Surge in a Hydraulic Line - S. P. Aktershev, A. P. Petrov, and A. V. Fedorov	428	92
Wave Flows of a Conducting Viscous Fluid Film in a Transverse Magnetic Field - Yu. N. Gordeev and V. V. Murzenko	431	96
Numerical Modelling of the Recoil of a Porous Cylinder from a Rigid Obstacle - S. P. Kiselev, V. M. Fomin, and Yu. A. Shitov	436	100
An Express-Estimate of the Rail Accelerator Parameters - A. P. Kuznetsov	440	104
Singularities of the Rotating Cylindrical Shell Convergence Process - S. M. Bakhrakh, N. P. Kovalev, V. A. Raevskii, Yu. M. Styazhkin, and T. A. Toropova	446	110
Kinetic Models of Disperse Media with Internal Degrees of Freedom - V. M. Kuznetsov	449	113

	Engl./Russ.	
Consideration of Variable Viscosity in the Dynamics of Soils and Porous Multicomponent Media - G. M. Lyakhov	455	119
Experimental Investigations of the Compressibility of Soils Subjected to Short-Term Loads Using an Automated System - A. F. Novgorodov, G. V. Rykov, and A. N. Sheinin	462	126
Problem of the Mechanical Characteristics of Soils with Allowance for Their Viscoplastic Properties under a Cyclic Dynamic Loading - I. N. Bychkov, G. V. Rykov, and I. A. Samsonova	465	129
Method of Elastic Characteristic Variation in the Problem of a Limiting Load - R. A. Kayumov	469	134
Action of a Moving Load on a Nonlinearly Compressed Plastic Strip with a Deformable Base - K. Atabaev, N. Mamadaliev, and N. Turaev	474	139
Axisymmetrical Contact Problems for Prestressed Deformable Bodies - V. M. Aleksandrov and I. V. Vorotyntseva	481	146
Residual Structural Stresses in Reinforced Shells of Rotation - A. G. Kozyuk and G. I. Starostin	488	153
Dislocations and Disclinations in Nonlinear Elastic Bodies with Moment Stresses - L. M. Zubov and M. I. Karyakin	493	160
Use of the Scattered Light Method in Order to Determine the Stress Intensity Factor K_{III} in Three-Dimensional Problems - V. M. Tikhomirov and V. P. Tyrin	500	167

Volume 31, Number 4, July-August, 1990

Employing the Methods from the Theory of Singularly Perturbed Systems to an Analysis of the Conditions under which a Magnetic Field is Frozen into an Electron Fluid - S. A. Trushin, M. M. Khapaev, and G. V. Sholin	505	3
Comparison of the Electric Fields in a Bolt of Lightning and in a Sliding Spark - E. A. Zobov and A. N. Sidorov	512	10
Scaling of Plasmafocused Radiation Discharges from an Erosion-Type Magnetoplasma Compressor - Yu. S. Protasov and S. N. Chuvashev	521	19
A Model of the Interaction between a Powerful Ion Beam and a Metallic Absorbing Material - V. I. Boiko, V. P. Kishkin, N. N. Prilepskikh, and I. V. Shamanin	528	26
An Experimental Study into the Nonsteady Radiation of a Jet Consisting of an Impact-Heating Gas Containing CO_2 - A. V. Eremin and V. S. Ziborov	533	31
Dynamics of the Condensation Front during Laser Reduction of Metals in High-Pressure Gases - A. G. Gnedovets, E. B. Kul'batskii, S. V. Selishchev, A. L. Smirnov, and A. A. Uglov	540	38
An Approximate Calculation of the Extent to which Shock Waves are Weakened by Permeable Barriers - B. E. Gel'fand and S. M. Frolov	544	42
Theory of the Hardening of Binary Melts with an Equilibrium Two-Phase Zone - Yu. A. Buevich, L. Yu. Iskakova, and V. V. Mansurov	548	46
Absorption of Sound near a Semiinfinite Rigid Plane - V. A. Murga	556	53
Numerical Modeling of the Process of Heating a Petroleum Stratum by Means of High-Frequency Electromagnetic Radiation - A. A. Kislitsyn and R. I. Nigmatulin	562	59
Axisymmetric Fundamental Solutions for the Equations of Heat Conduction in the Case of Cylindrical Anisotropy of a Medium - S. E. Mikhailov	567	64
Contact Problem in the Theory of Elasticity for Narrow Areas, with Wear Taken into Consideration - A. N. Burmistrov	571	68
Waveguide Effect in a One-Dimensional Periodically Penetrable Structure - S. V. Sukhinin	580	77
Self-Oscillation Regimes in a System of Four Quasi-Two-Dimensional Vortices - A. M. Batchaev	588	85
Calculating the Nonisothermal Separation Streamlining of a Sphere - K. B. Koshelev and M. P. Strongin	594	91

	Engl.	Russ.
Developing Models to Calculate the Exchange of Heat under Conditions of Supersonic Turbulent Detached Flows - A. A. Zheltovodov, E. G. Zaulichnyi, and V. M. Trofimov	599	96
Impurity Dispersion in Nonuniform Flows - A. I. Moshinskii	607	104
Effect of Wave Processes on the Viscous–Nonviscous Interaction of a Sub- and Supersonic Jet with a Super- and Subsonic Secondary Flow in a Channel and in a Tube - I. S. Belotserkovets and V. I. Timoshenko	615	112
Analysis of Stability in a Self-Similar Circular Jet with Consideration of the Nonparallel Effect - O. A. Likhachev	621	118
Flow and Heat Exchange in a Layer of a Viscous Conducting Fluid between Rotating Plates with Horizontal Gradients of Temperature in a Transverse Magnetic Field - S. N. Aristov and A. M. Pichugin	627	124
Studying the Aerodynamics of Apparatus with a Nonmoving Granular Bed - Sh. A. Ershin, U. K. Zhapbasbaev, M. Sh. Kulymbaeva, and L. G. Khadieva	631	128
Nonsteady Oscillations of a Thin Rod in an Elastic Half Space - L. N. Yungerman	637	134
Investigating the Process of the Steady Extrusion of a Compacted Material - S. E. Aleksandrov and B. A. Druyanov	645	141
A Mathematical Model of the Processes of Fatigue Wear and Disintegration - I. I. Kudish	649	145
An Ultrasound Method for Experimental Evaluation of Field Nonuniformities in Internal Dynamic Stresses - V. P. Lebedev and V. M. Rodyushkin	656	153
Long Waves of Finite Amplitude in Polydispersed Gas Suspensions - N. A. Gumerov	660	157

Volume 31, Number 5, September-October, 1990

Calculated Characteristics of the Anode Region of a Longitudinal Discharge Including Diffusion - R. Sh. Islamov	665	3
Two Forms of Discharge in Argon Plasmas with an Emission-Active Potassium Additive - V. O. German and V. S. Uspenskii	667	6
Theory of the Interaction of a Shock Wave with a Boundary Layer on a Moving Surface - A. P. Khokhlov	670	8
Refinement of the Equal-Areas Law for Unsteady Plane Shock Waves of Moderate Intensity - S. N. Makarov	675	14
Determination of the Asymptotic of the Combustion Wave Velocity by Successive Approximations - Vit. A. Vol'pert and Vl. A. Vol'pert	680	19
Propagation of Unsteady Weak Shock Waves in a Vibrationally Nonequilibrium Gas Subjected to External Radiation - A. N. Bogdanov and V. A. Kulikovskii	687	26
Propagation and Attenuation of Waves Generated in a Layer by a Plane Source - I. A. Zaitseva and A. A. Zolotarev	696	35
Influence of the Thermocapillary Effect on the Shape of a Free Boundary at High Marangoni Numbers - V. A. Batishchev	702	41
Droplet Size Distribution in a Percolation Model for Explosive Liquid Dispersal - F. M. Sultanov and A. L. Yarin	708	48
Stability in a Laminar Gas Boundary Layer with Simultaneous Heating and Cooling - Yu. B. Lebedev and V. M. Fomichev	714	54
Detached Flow Past a Heated Cylinder at Low Mach Numbers - A. B. Ezerskii	716	56
Instability of the Entropy Layer on a Blunt Plate in Supersonic Gas Flow - A. V. Fedorov	722	63
Effect of Dispersed Impurities on the Rise of a Dusty Thermal - G. M. Makhviladze and S. E. Yakush	729	69
Hydraulic Resistance in Thin-Layer Spherical Packings - S. L. Demenok, V. V. Medvedev, S. M. Sivukha, and N. N. Suntsov	737	77
Heat and Mass Transfer through a Horizontal Grid Grating in a Fluidized Bed - A. P. Burdukov, G. G. Kuvshinov, and A. I. Mukhin	740	81

	Engl.	Russ.
Free Convection Heat Transfer in an Open System of Vertical Rods - V. I. Eliseev and Yu. P. Sovit	747	88
Modification of the Method of Discrete Continuation by Parameters - É. I. Grigolyuk and E. A. Lopanitsyn	754	95
Osculation of Two Nonlinearly Elastic Bodies - L. G. Dobordzhginidze	758	99
Stability of a Rectangular Plate beyond the Elastic Limit - A. M. Kovrizhnykh	763	105
Bending Resonant Waves in a Shell with Associated Masses - I. A. Potashnikov	770	111
Deformation and Failure under Impact Loading. Model of a Thermoelastoplastic Medium - A. B. Kiselev and M. V. Yumashev	775	116
Plastic Zone around a Round Hole in a Plane with a Nonuniform Basic Stressed State - N. P. Ostrosablin	783	124
Transient Creep of an Ice Sheet Lying on a Hydraulic Base under a Concentrated Load - V. M. Aleksandrov and A. A. Shmatkova	793	132
Flow and Separation of a Rarefied Binary Gas Mixture in a Cylindrical Gap with Supersonic Rotation of the Outer Cylinder - V. D. Borisevich and S. V. Yupatov	799	139
Kolmogorov Constants in the Spectra of Anisotropic Turbulence - S. R. Bogdanov	802	142

Volume 31, Number 6, November-December, 1990

	Engl.	Russ.
Influence of Viscosity on the Nature of the Propagation of a Plane Extensional Shock Wave - A. A. Burenin and Yu. A. Rossikhin	807	13
Self-Similar Solution of the Problem of Three-Dimensional Spreading of a Nonlinearly-Viscous Fluid - F. Kh. Akhmedova and L. M. Kotlyar	811	17
Convection in a Medium with Spiral Turbulence - Yu. A. Berezin and V. P. Zhukov	816	22
Influence of Phase Transitions on Sound Propagation in Fogs: Comparison of Theory with Experiment - D. A. Gubaidullin and A. I. Ivandaev	820	27
Modelling Two-Phase Flows with a Phase Interfacial Surface - S. E. Ageev, V. T. Movchan, A. M. Mkhitaryan, and E. A. Shkvar	827	34
Taking Account of Local Singularities of a Vortex Lifting Surface in the Method of Discrete Vortices - D. N. Gorelov and O. V. Chernov	831	38
Calculation of Separated Flows by means of Boundary-Layer Equations - V. I. Vasil'ev, S. V. Khokhlov, and E. Yu. Shal'man	839	46
Mutual Effects of Vibrational-Dissociative Relaxation in the Supersonic Flow of a Viscous Gas Past Bluff Bodies - A. G. Tirskii and V. G. Shcherbak	848	55
Relaxational Properties of a Turbulent Shear Flow Across a Cylinder in the Presence of a Plate - V. I. Kornilov and D. K. Mekler	854	61
Calculation of the Flow of a Gas with Particles Past Bluff Bodies with Allowance for the Effect of Reflected Particles on the Flow of the Aerosol - Yu. M. Davydov, I. Kh. Enikeev, and R. I. Nigmatulin	860	67
Influence of the Entropy Layer on the Stability of a Supersonic Shock Layer, and Transition of the Laminar Boundary Layer to Turbulence - V. I. Lysenko	868	74
Dynamic Processes in a Free Granular Layer during Gas Filtration with a Sudden Pressure Drop - V. A. Antipin, A. A. Borisov, and A. P. Trunev	874	80
Heat and Mass Transfer to Particles during Separation-Free Jet Flow and Internal Transfer in a Granular Bed - Yu. A. Buevich and V. A. Ustinov	882	89
Heat Conductivity of Concentrated Suspensions - B. É. Kashevskii, V. I. Kordonskii, I. V. Prokhorov, and N. G. Khutskaya	887	94
Comparison of Two Schemes of Counter-Collision of Jets Having Different Bernoulli Constants - N. N. Lukerchenko	890	97
Contact Problem for a Layered Inhomogeneous Aging Cylinder Reinforced by a Rigid Ring - A. V. Manzhirov and V. A. Chernysh	894	101

Engl./Russ.

Analysis of Elastoplastic Flows on Irregular Triangular Grids with Restructuring - V. N. Aptukov and A. V. Fonarev 901 109
Axial Compression of an Inhomogeneous Cone - M. A. Zadoyan and N. B. Safaryan 906 115
Effective Elastic Moduli of Third-Order Composite Materials - V. A. Buryachenko and A. M. Lipanov 909 118
Density Distribution in Pulsed Gas Jets Effusing into a Rarefied Space - A. V. Eremin and I. M. Naboko 914 123
Symmetrization of the Equations of Dynamics of a Capillary Liquid - L. K. Antanovskii 918 128
